Origins of the Canary Island "Naife" Discovered

The Canary Islands "naife", a popular tool for centuries with farmers in the islands, has its origins in Albacete and Toledo in the 16th Century and gets its name from the English word, "knife". Indispensable in the cultivation of bananas, the major difference between the Canary Islands' and mainland versions is the size of its steel blade.

Noticia publicada en el diario británico Secrets News que se hace eco de la teoría sobre el origen y procedencia del Cuchillo Canario elaborada por Alejandro C. Moreno y Marrero.
